- Following the modern trends in orthopedic surgery, traumatology and general reconstructive surgery, as well neurosurgery and neurology, followed by physical medicine and rehabilitation, the position of expansive professional and personnel policy affirms the position, implementing new methods and techniques of surgical performance and after surgical patient care and well being.

Basic information about the hospital

- Hydrotherapy pool

ST. ERAZMO HOSPITAL AS A PART OF THE PROJECT - QUALITY HEALTH

- As all partners are familiar, we faced difficulties during the overall implementation of this project, difficulties that we managed to overcome with a lot of work. The main culprit is Covid-19 situation in which we all are, and we as a public health institution are one of the hardest hit.
- Although faced with the global problem, we managed to implement the tender procedures for procurement of medical equipment for the needs of the hospital in order to improve the health care of the entire region.
- for physical therapy and rehabilitation for the needs of the patients being treated in the hospital and those coming from outside the hospital.

ST. ERAZMO HOSPITAL AS A PART OF THE PROJECT - QUALITY HEALTH

- With the first tender procedure we managed to procure for equipment for physical therapy and rehabilitation for the needs of the patients being treated in the hospital and those coming from outside the hospital. Machines for ultrasound therapy, magnetotherapy, laser therapy and electrotherapy were procured. The devices are working great and meet the needs of all patients and there is great satisfaction from the use of them both by patients and by staff who handles them.
- Also were procured ECG machines and Patient monitors for intensive care unit

Appliance operation training

News from our hospital – MRI Scanner – Donated by EU

- We want to use this opportunity to inform the public that with the help of funds from the European Union was purchased MRI Machine that has already been installed and put into use in the St. Erazmo Hospital, which further contributes to improving the health care of the population in the region and we are very grateful for the extended hand by the European Union.

Thank you for your attention!
